

12.1M NIFTYLIFT HR12L - ELECTRIC SELF-PROPELLED BOOM

Working Height: 12.1m

GVW: 2,540kgs

Platform Capacity: 2 outdoors

Lift Capacity: 200kgs

Platform Capacity: 2 indoors

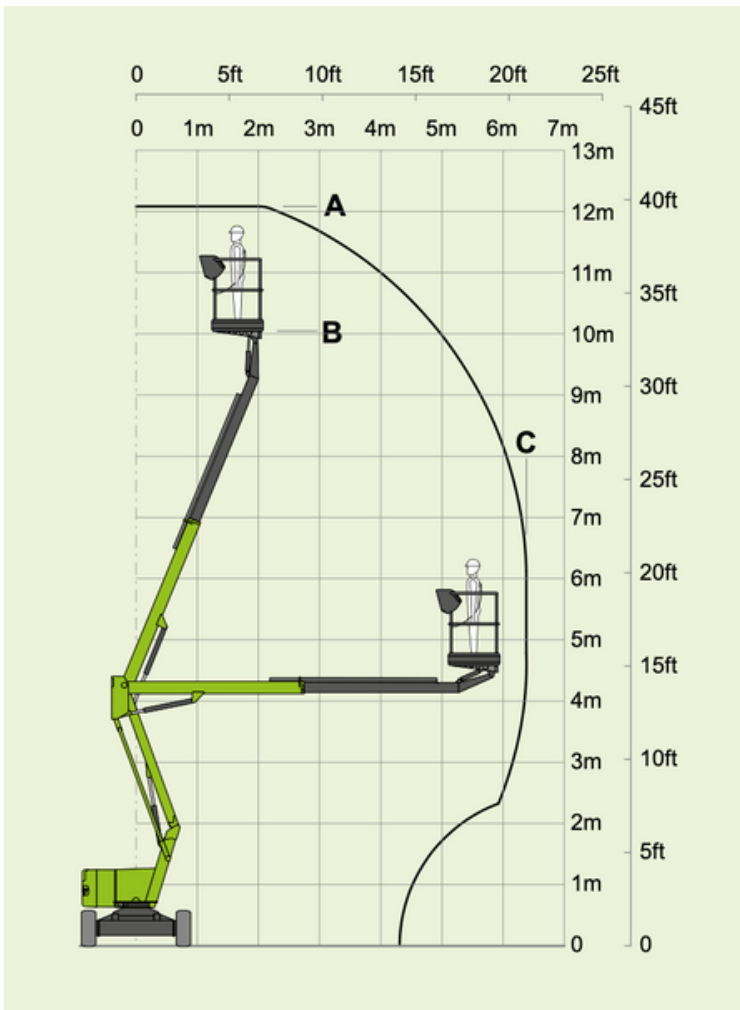

IPAF Category 3b

The Niftylift HR12L is a new generation boom and one of the lightest, most versatile and environmentally conscious platforms on the market. It offers a 12.1 metre working height and a 6.4 metre horizontal outreach. It is particularly suited to industrial locations, such as factories and warehouses.

12.1M NIFTYLIFT HR12L - ELECTRIC SELF-PROPELLED BOOM

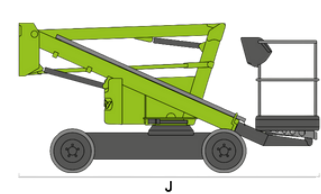

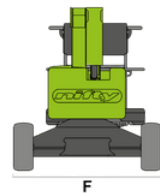

The HR12L can be driven from the cage while elevated and delivers an impressive working envelope from the manoeuvrable chassis. The super-efficient battery power system, means the batteries work for twice as long. With a compact turning circle, manoeuvring is easy, especially where ground space is restricted.
