

12.2M NIFTYLIFT HR12NDE - BI-ENERGY SELF-PROPELLED BOOM

Working Height: 12.2m

GVW: 3,060kgs

Platform Capacity: 2 outdoors

Lift Capacity: 200kgs

Platform Capacity: 2 indoors

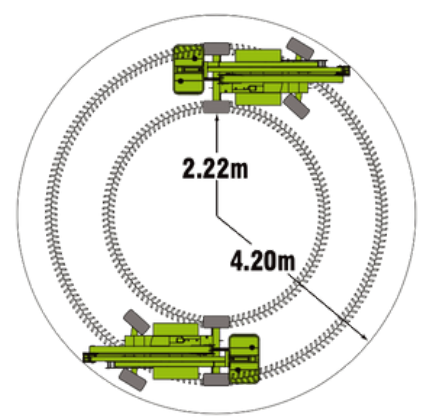

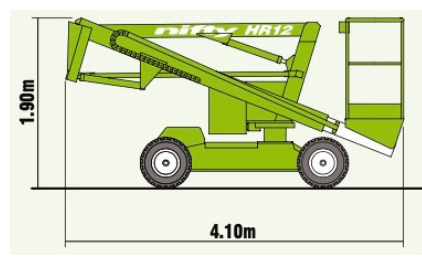

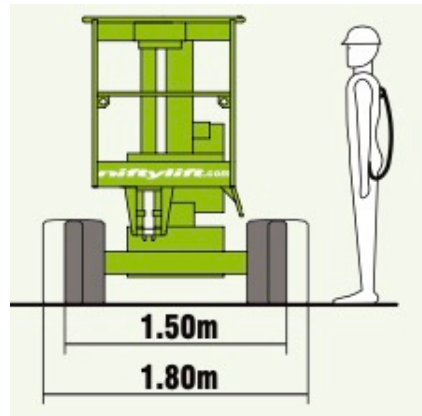

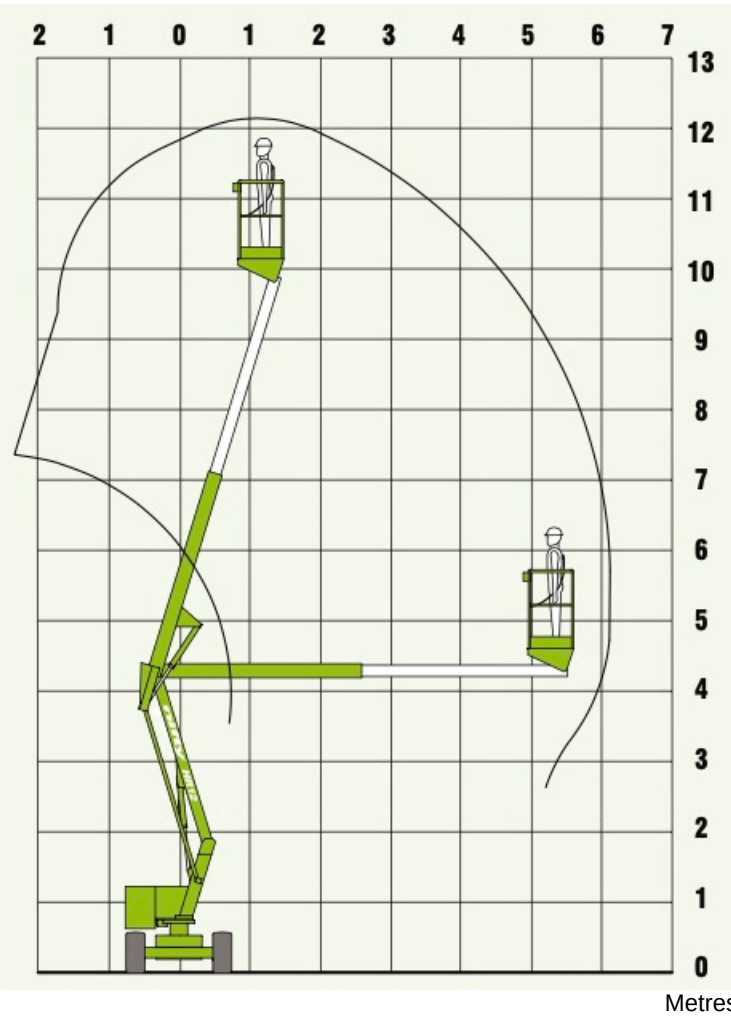

IPAF Category 3b

The HR12NDE is bi-energy and offers up to 12.2m working height and 6.1m horizontal reach. It is specifically designed to give maximum reach performance from the lightest, most compact base. These machines are perfect for working in industrial environments such as factories and warehouses where space is restricted.

12.2M NIFTYLIFT HR12NDE - BI-ENERGY SELF-PROPELLED BOOM

The HR12NDEs can work for long periods of time and travel lengthy distances outside. When indoors, it is very easy to switch to quiet, fume-free electric operation straight away. Driven from the cage, they can be easily driven from one location to the next. A compact turning circle, makes manoeuvring very simple.

Power: Bi-Energy - Diesel & Electric | Terrain: Indoors/Outdoors < 25% gradient
